

The NG10 direct operated directional control valve series D3W provides high functional limits up to 150 l/min in combination with a low, energy saving pressure drop.

The wide variety of options includes soft shift anchor tubes for smooth operation.

Versions with position control, additional surface protection and connector variants are shown in the following chapters.

Flow curve diagram

All characteristic curves measured with HLP46 at 50 °C.

The diagrams below specify the shift limits for valves with DC and AC solenoids. Valves with spool position “F” or “M” can only be operated up to 70 % of the limits. The specifications apply to balanced flow conditions. The

shift limits can be considerably lower at unbalanced flow conditions. To avoid flow rates beyond the shift limits, a plug-in orifice can be inserted in the P-port.

Shift limits, DC voltage

Measured with HLP46 at 50 °C, 90 % U_{nom} and warm solenoids.

Shift limits, AC voltage

Measured with HLP46 at 50 °C, 95 % U_{nom} and warm solenoids.

Shift limits soft shift

The diagrams below specify the shift limits. Valves with spool position "F" or "M" can only be operated up to 70 % of the limits. The specifications apply to balanced flow condi-

tions. The shift limits can be considerably lower at unbalanced flow conditions. To avoid flow rates beyond the shift limits, a plug-in orifice can be inserted in the P-port.

Measured with HLP46 at 50 °C, 90 % U_{nom} and warm solenoids.

Response times D3W Soft Shift

Code	Orifice size	Energize	De-energize
(Standard)	—	105 ms (DC) 21 ms (AC)*	85 ms (DC) 35 ms (AC)*
S4	1.0 mm	320 ms	550 ms
S7	1.75 mm	160 ms	370 ms

Step response times were obtained under the following conditions: HLP46 at 50 °C with the valve operating at 175 bar and 65 l/min. Published response times are nominal and may vary with spool, flow, pressure and temperature.

Acceleration for different orifice sizes (archived against a valve without soft shift)

For even softer shifting, the proportional spools 081, 082, 101 and 102 can be used.

* For AC input and soft shift use rectifier plug.
